Prashanth C

Backend Developer

prashanthmt2022@gmail.com | +91 99011 88833 | Bengaluru (Bangalore), India | https://linkedin.com/in/1PrashanthC

PROFESSIONAL SUMMARY

Backend developer with 3.5+ years of experience in PHP and Laravel, with a track record of owning complex products end to end, from architecture to production. Built a phishing simulation platform from scratch, a SOC 2 compliance platform with Windows and Linux agents, and the entire backend of a 7-application property platform for a Dubai client. Experienced in third-party API integrations, MySQL performance tuning, and production support. Known for shipping fast, adopting new stacks with AI, and mentoring junior developers.

PROFESSIONAL EXPERIENCE

Software Engineer Sr. Executive, Succeed Technologies, Bengaluru **Jul 2025 – Present**

- Build and own the company's security, compliance, and marketing products in PHP and Laravel, handling the full release cycle (testing, deployment, and production support and debugging) with no dedicated QA team.
- Built an AI-powered automation that delivers 150+ sales leads and tender details per day across 4 products to the sales team.
- Built a Cursor extension that automates feature testing, and ran knowledge-sharing sessions to bring AI tools into the team's daily work.
- Set up an in-house local server to host the company's development sites, reducing cloud hosting costs.

Trainee Developer, Zysk Technologies Pvt Ltd, Bengaluru **Mar 2023 – Jun 2025**

- Delivered backend development for client projects in Laravel, including the company's major international client project.
- Interviewed and hired 3 junior developers, and trained and mentored new team members to get them productive on live projects.
- Built Filament admin panels for clients, tested and documented APIs with Postman, and managed code on GitHub.

PROJECTS

Phishing Simulation Platform **Succeed Technologies**

Duration: 12 Months (Phase 1 delivered in 2–3 Months) | Environment: Laravel, Twilio, AWS SNS, AWS SES, Azure Storage

Skills: PHP, MySQL, REST APIs, Queues and Background Jobs

Description: A security awareness platform that lets organizations run simulated phishing campaigns against their employees to test and train how they respond to real phishing attacks.

Responsibilities:

- Planned the application's architecture, database design, and module structure from scratch.
- Built multi-channel simulations: email phishing via AWS SES, voice phishing (vishing) via Twilio, and SMS phishing (smishing) via AWS SNS.
- Developed the core features in PHP and Laravel and took ownership of the product from planning through production.
- Tested, deployed, and maintained the application with no dedicated QA team.

GRC Platform for SOC 2 Compliance **Succeed Technologies**

Duration: 4 Months | Environment: Laravel, .NET (Agents)

Skills: PHP, MySQL, .NET (AI-assisted), REST APIs, SOC 2

Description: A governance, risk, and compliance platform used by clients to track their security controls and stay audit-ready for SOC 2.

Responsibilities:

- Designed and built the platform's backend, dashboards, and compliance tracking features.
- Built Windows and Linux endpoint agents in .NET that collect device compliance data and sync it to the central dashboard.
- Used AI-assisted development to ship both agents on a previously unfamiliar stack.

Email Marketing Application and Newsletter System **Succeed Technologies**
Duration: 1 Month | Environment: Laravel, AWS SES
Skills: PHP, MySQL, Queues and Background Jobs
Description: An email marketing application and newsletter system for creating, sending, and managing email campaigns and newsletters to subscriber lists, with a built-in domain warm-up system to protect sender reputation and deliverability.
Responsibilities:

- Independently designed and built both systems, with email delivery through AWS SES.
- Built a domain warm-up system that gradually ramps up sending volume to improve inbox placement.
- Handled testing, deployment, and production support end to end.

Property Management Platform for a Dubai Client **Zysk Technologies**
Duration: 18 Months | Environment: Laravel, Filament, Core PHP
Skills: PHP, MySQL, REST APIs
Description: A property management platform for a Dubai-based client, made up of 7 interconnected applications: a resident web and mobile app, vendor portal, gatekeeper app, technician app, admin panel, and accounting admin panel.
Responsibilities:

- Built the entire backend for all 7 applications, including REST APIs powering the resident, gatekeeper, and technician mobile apps.
- Designed the MySQL database schemas and business logic across the platform.
- Built the main admin panel in Filament and the accounting admin panel in core PHP.
- Optimized MySQL queries and indexes to keep the platform fast as data grew.
- Tested and documented APIs with Postman and managed code on GitHub.

Wedding Photo Management Application **Zysk Technologies**
Duration: 4 Months | Environment: Laravel, AWS Rekognition, AWS S3
Skills: PHP, Python, MySQL, REST APIs
Description: A wedding photo management application where guests upload a single photo of their face and instantly find every photo they appear in.
Responsibilities:

- Built the AI face recognition feature with AWS Rekognition, first prototyping it in Python and then migrating it to PHP/Laravel for production.
- Set up photo storage and retrieval on AWS S3.

ADDITIONAL PROJECTS

- Programmable Mailbox System (Succeed Technologies): Laravel-based mailbox that receives mail through Cloudflare Email Routing and sends through Resend, with an admin panel.

SKILLS

Languages: PHP, SQL, JavaScript, HTML, CSS, Python (basic)
Laravel and PHP: Laravel, Filament, Eloquent ORM, Blade, Artisan, Composer, OOP, MVC
Databases: MySQL, Query Optimization, Indexing, Database Design
Backend: REST APIs, Third-Party API Integrations, Queues and Background Jobs, Caching (Laravel Cache), Email Deliverability (Domain Warm-up), System Design
Testing and Tools: PHPUnit/Pest, Nginx/Apache, Git/GitHub, Postman
Cloud and Services: AWS (S3, SES, SNS, Rekognition), Azure Storage, Twilio, Cloudflare, Resend
Platforms: Windows, Linux
Other: SOC 2 Compliance, Production Support, Agile, AI-Assisted Development, AI Automation, Cursor, Cursor Extension Development

EDUCATION

B.E., The Oxford College of Engineering **2022 | CGPA 7.55**

PU, Carmel Pre-University College **2018 | 71%**

10th, New Florence English School **2016 | 84%**
